Dev to  
Senior Dev

Always  
Learning

Ali Spittel    
@ASpittel

The most important skill to have as a programmer is the ability to teach yourself new things effectively and efficiently.

You're going to be constantly growing and picking up new technologies. The ability to do that is more important than any individual tool or technology.

- Invest in yourself.
- Learn how you learn best.
- Build an environment for you to constantly learn and grow.

Senior Dev

Always  
Learning

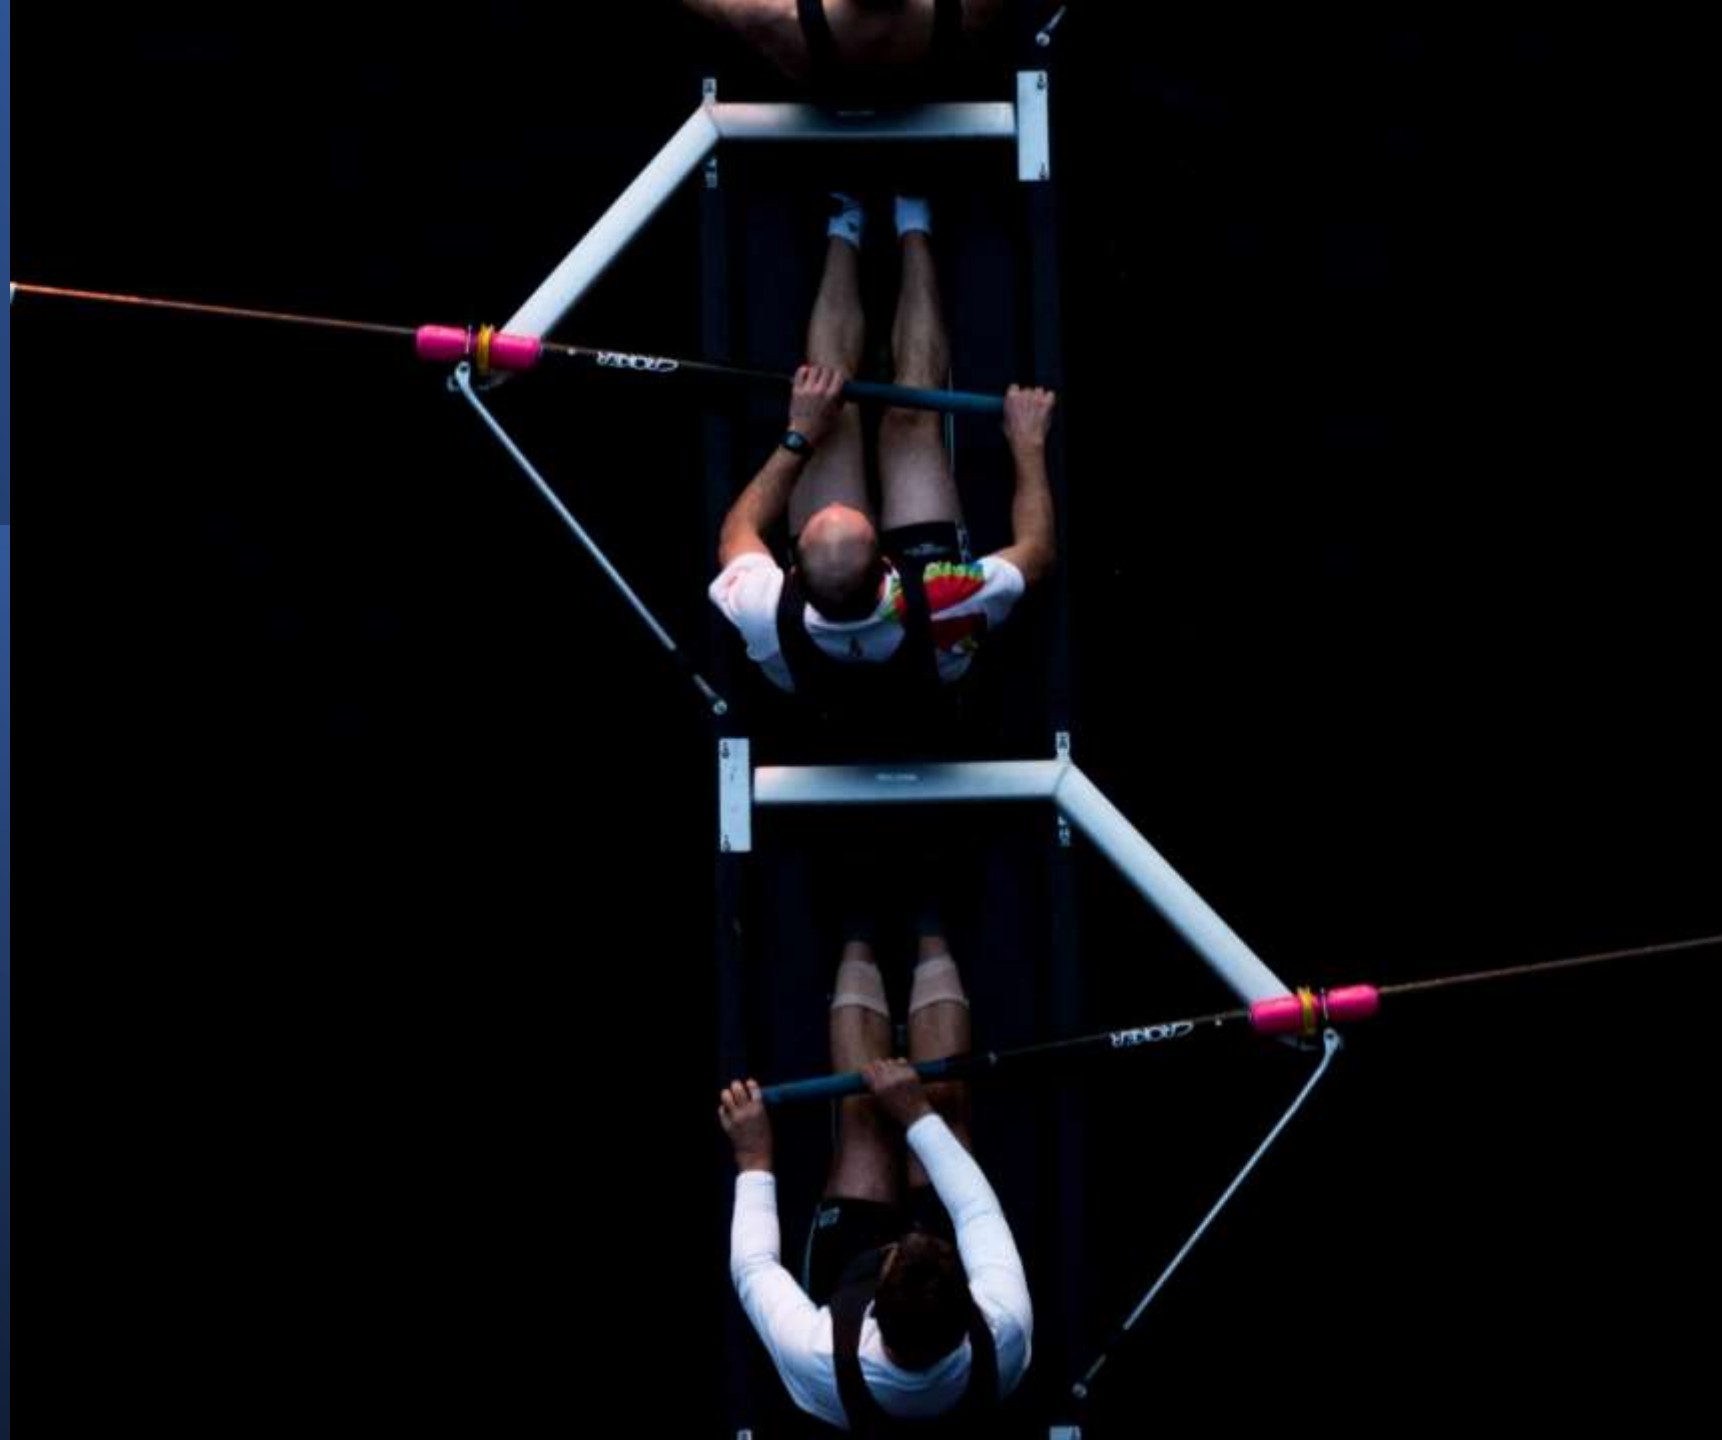

*The Programmer's Brain* explores the way your brain, and your teams', works when it's thinking about code. You'll improve your code comprehension by turning confusion into a learning tool, and pick up awesome techniques for reading code and quickly memorizing syntax with easy to use exercises and tricks.

Architect

Visionary

# **Abstract Business Goals to Reality**

Role of an  
Architect

Not Required  
to Know  
Everything

Role of an  
Architect

Not Required  
to Know  
Everything

A tropical beach at sunset. The sun is low on the horizon, casting a warm glow over the turquoise ocean and the sandy shore. The sky is filled with soft, colorful clouds. The text is overlaid on the top left of the image.

**The larger the island of knowledge,  
the longer the shoreline of wonder.  
– Ralph W. Sockman**

**It's okay to not know everything.  
It's impossible anyway.**

Role of an  
Architect

Designing for  
the Future

# Role of an Architect

## Multi-Role Capabilities

Role of an  
Architect

Multi-Role  
Capabilities

A fire performer in a suit with a flame pattern is balancing on a barrel and juggling flaming torches. The performer is wearing a red cap and is looking up at the torches. The background shows a brick building and some trees. In the foreground, there are people watching the performance. A sign on the barrel says "FIRESHOW".

**Business Analyst**  
**Project Manager**  
**Product Manager**  
**Developer**

Vision → Explore and Define the Future

Always Learning

Motivational & Inspirational → Help Others

Confident & Committed → Find Solutions

**Oracle Cloud Infrastructure**  
**Alibaba Cloud**  
**VMware by Dell**

# Role of a Cloud Architect

World-Wide  
Options

## Role of a Cloud Architect

## Technical Skills Networking

A network is one of the foundational components of any cloud solution.

vLAN

Subnets

CIDR

Security Groups

Firewall

IDS/IPS

Virtual Appliance

Load Balancers

PrivateLink

OSI Model

Route Table

vNet == Virtual Network

VPC == Virtual Private Cloud

vLAN == Virtual Local Area Network

CIDR == Classless Inter-Domain Routing

IDS == Intrusion Detection System

IPS == Intrusion Prevention System

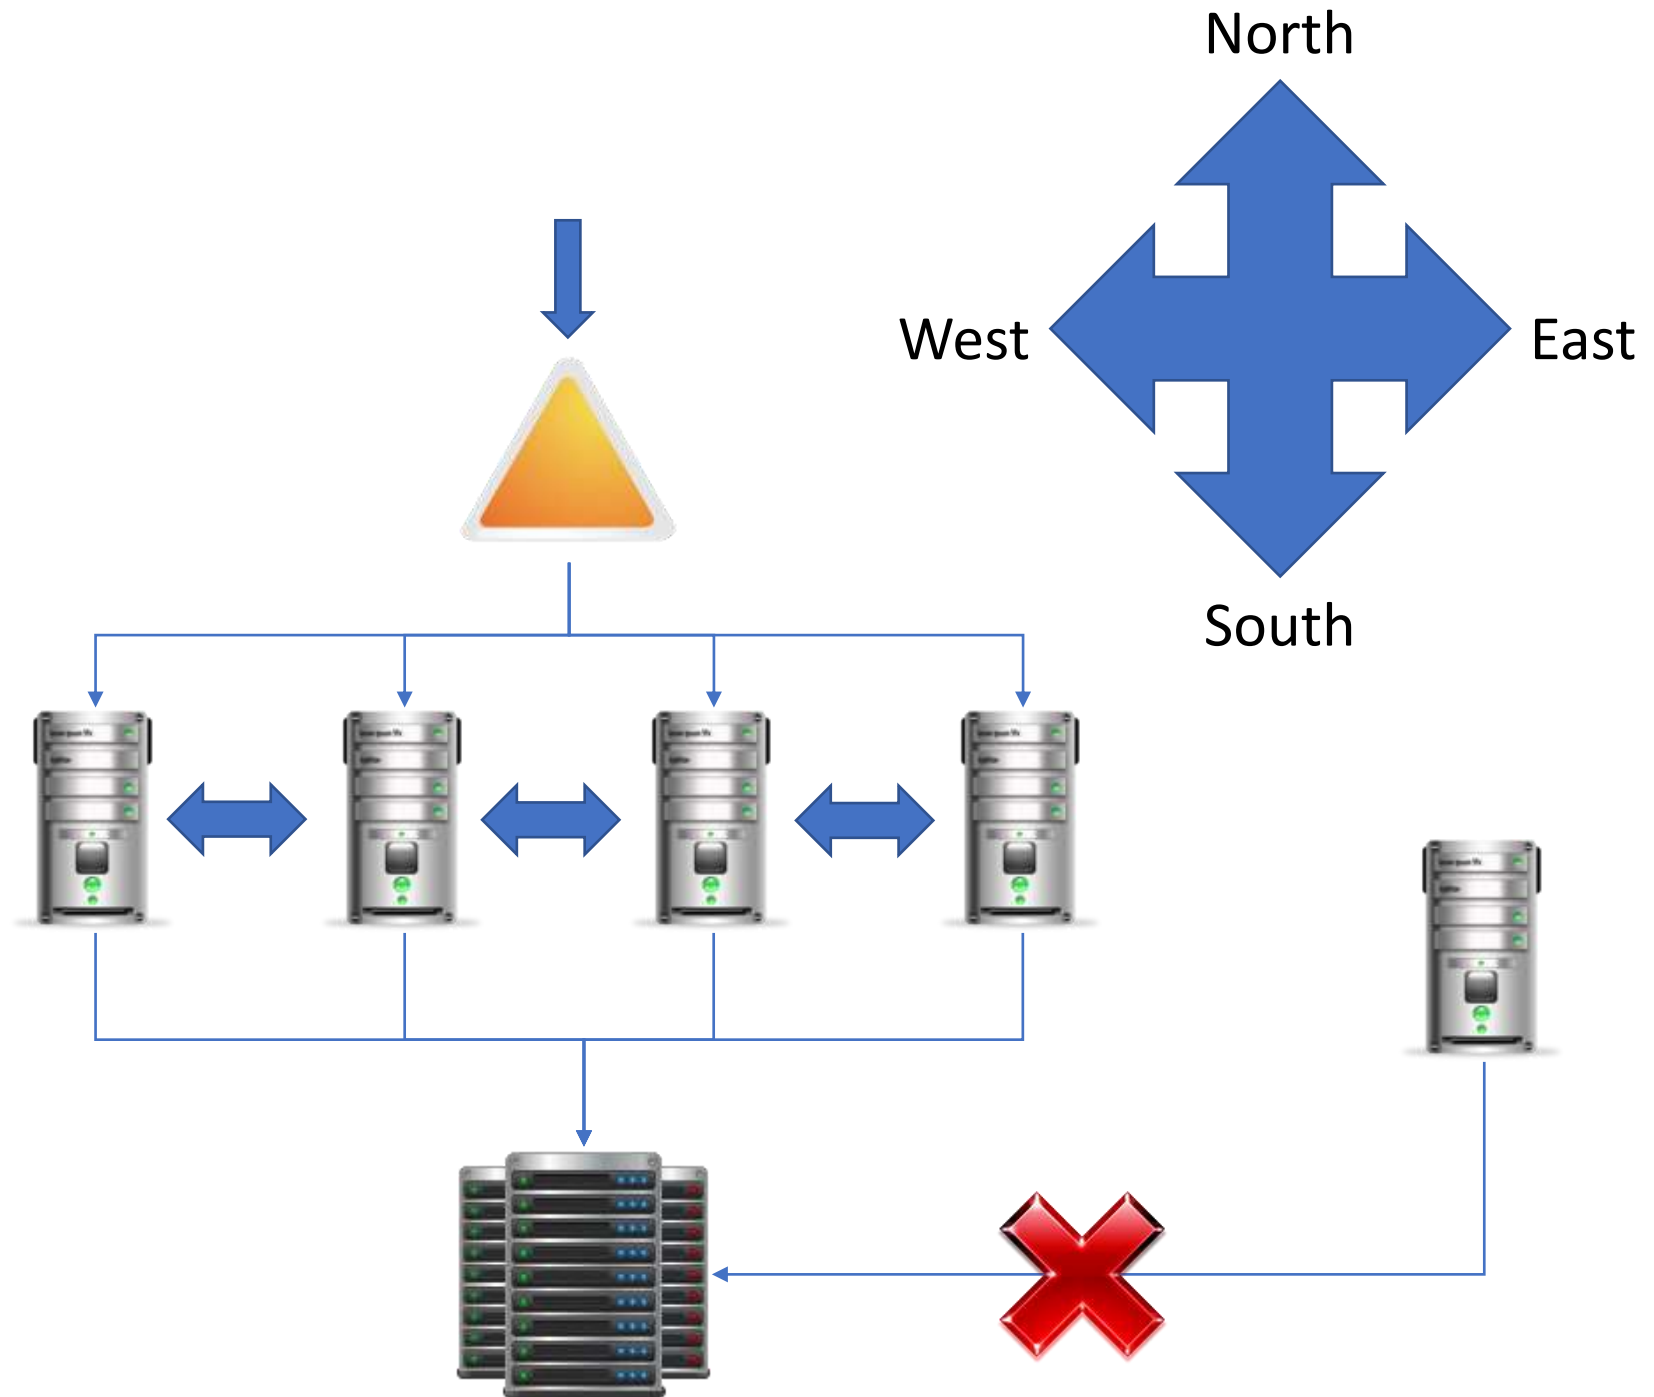

OSI == Open Systems Interconnection Model

Data ingress & egress

Role of a  
Cloud  
Architect

Technical Skills  
Networking

## Role of a Cloud Architect

## Technical Skills Computing

### VMs & EC2

#### Serverless

- AWS Lambda
- Azure Functions

VM == Virtual Machine

EC2 == Elastic Cloud Computing

#### Operating Systems

- Windows
- Linux

## Role of a Cloud Architect

## Technical Skills Containerization

### Kubernetes

- AKS
- EKS

### Registries

- ACR
- ECR

### Container Services

- ACS
- ECS

AKS == Azure Kubernetes Service

EKS == AWS Elastic Kubernetes Service

ACR == Azure Container Registry

ECR == AWS Elastic Container Registry

ACS == Azure Container Service

ECS == AWS Elastic Container Service

## Role of a Cloud Architect

## Technical Skills Database

### Relational

- SQL Server
- Aurora

### NoSQL

- CosmosDB
- DynamoDB
- DocumentDB

### Analytics

- Azure Synapse
- AWS Redshift

### Geo-Redundancy

RPO / RTO

Consistency Levels

ACID / ACID 2.0

CAP Theorem

RPO == Recovery Point Objective

RTO == Recovery Time Objective

ACID == Atomicity, Consistency, Isolation, Durability

---

ACID 2.0 == Associative, Commutative, Idempotent, Distributed

CAP == Consistency, Availability, (network) Partitioning

“ACID 2.0” – Pat Helland

Michael Perry – [immutablearchitecture.com](http://immutablearchitecture.com)

## Role of a Cloud Architect

## Technical Skills Storage

### Storage Accounts

#### AWS

- S3 Buckets
- EBS
- EFS

S3 == Simple Storage Solution

EBS == Elastic Block Storage

EFS == Elastic File Storage

#### Azure

- Blob
- File
- Table

## Role of a Cloud Architect

Technical Skills  
Security

### Identity

- IAM
- RBAC

### Network

- Penetration Testing
- DDoS
- Bastion

IAM == Identity & Access Management

RBAC == Role Based Access Control

DDoS == Distributed Denial of Service

## Role of a Cloud Architect

## Technical Skills Messaging

Message Bus

RabbitMQ  
ActiveMQ

Azure  
Service Bus  
Event Hubs  
Event Grid  
Relay

AWS  
MQ  
SQS  
SNS

AWS MQ == AWS Message Queue  
AWS SQS == AWS Simple Queue Service  
AWS SNS == AWS Simple Notification Service

## Role of a Cloud Architect

## Technical Skills Data Centers

### Regional Capabilities

#### Azure

Several regions in the US

Up to 3 Availability Zones per Region

#### AWS

4 regions in the US

Up to 6 Availability Zones per Region

#### Paired Regions

- Infrastructure updates
- Data residency

## Role of a Cloud Architect

## Technical Skills Disaster Recovery

### Geo-Redundant Availability

- Hot/Hot
- Hot/Warm
- Hot/Cold

### Geo-Redundant Data/Storage

Code deployments to multiple locations

Workbooks / Runbooks

TEST your DR solutions !

## Role of a Cloud Architect

Technical Skills  
DevOps

### Azure

- DevOps

### AWS

- Code Build
- Code Deploy
- Code Pipeline

### Deployment Options

- Swap
- Rolling Updates
- Blue/Green
- Canary

### Consider “Infrastructure as Code”

- Terraform
- Pulumi
- ARM Templates
- CloudFormation

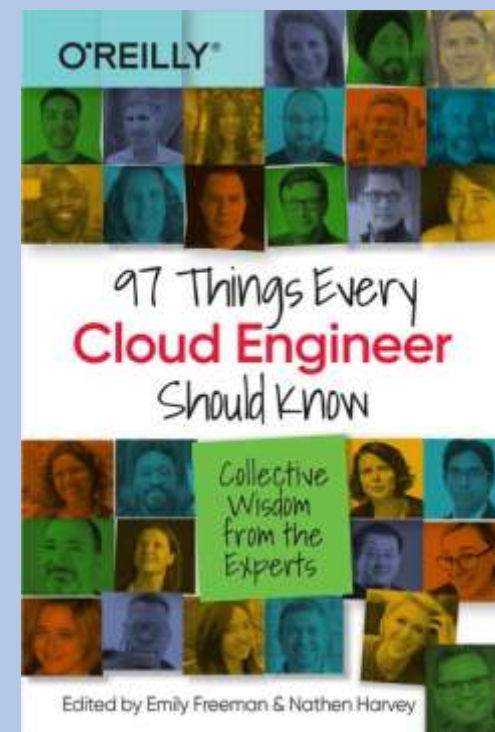

Role of a  
Cloud  
Architect

Technical Skills  
Design

Everything in architecture is about Trade-Offs  
– Neal Ford & Mark Richards
